

FIG. 1

FIG. 2 is a block diagram of a system for generating a virtual background for a video recording. The system includes a digital camera 204, a compositor (ultimate) 202, a virtual background generator 201, and a digital monitor 203. The digital camera 204 is connected to the compositor 202, which is connected to the virtual background generator 201. The virtual background generator 201 is connected to the digital monitor 203. The digital monitor 203 displays a virtual background image. The system is used for generating a virtual background for a video recording.
